Summary

As a Frontend Developer, I have hands-on experience in building efficient web applications using **Angular**, **React**, **TypeScript**, **JavaScript**, **Redux**, **Vite**, and **Tailwind CSS**. Skilled in writing clean code, optimizing UI/UX, and collaborating in teams. I strive to deliver scalable, maintainable, and high-quality projects following principles such as SOLID, DRY, KISS, and YAGNI.

Skills

- **Core**: HTML5, CSS3, JavaScript, TypeScript, Angular, React, Redux, Tailwind CSS
- **Additional**: Angular Material, PrimeNG, Ant Design, Bootstrap, SASS, Git
- **Soft Skills**: Adaptability, Problem-Solving, Teamwork, Working Under Pressure

Work Experience

Software for Business Development   Tashkent, Uzbekistan

Frontend Developer   December 2024 – Present

- Developed and deployed multiple corporate websites and web applications: **SBD Website**, **SBD Store**, **Usta.uz**, **Eleven Water**, **Asman Group**, **Durable Development**, **Cosco Engineering**, **Luxline**, **Asvad Group**, **Cosmo Cargo**, **Laminox**, **Calinart**, **Khatdecor**.
- **Calinart** — online learning platform. Built user panel with course purchase and viewing options. Implemented admin panel for course management, user control, and payment system integration.
- **Eleven Water** — drinking water delivery platform. Developed user interface, order flow, and REST API integration. Ensured responsive design and optimized performance.
- **Khatdecor** — automated system for an MDF manufacturing plant. Collaborated in a team project contributing to login/authentication, product management, warehouse, sales, payment systems, and reporting modules.
- Technologies: Angular, TypeScript, Tailwind CSS, REST API, RxJS, i18n (ngx-translate), Telegram WebApp, Yandex Maps, Google Maps.

Learned Knowledge

- Frontend technologies: HTML5, CSS3, JavaScript, TypeScript, Angular, Tailwind CSS, Bootstrap, PrimeNG.
- REST API, authentication and authorization (JWT, session management).
- Maps integration: Yandex Maps, Google Maps.
- Telegram WebApp for order and payment systems.
- Multi-language support (i18n, ngx-translate).
- Clean Code principles (SOLID, DRY, KISS, YAGNI).

Certificates and Training

Frontend Development Program   November 2024

Najot Ta'lim   Tashkent, Uzbekistan

- JavaScript: map, filter, reduce, forEach, find, some, every methods.
- React Hooks: useState, useEffect, useContext, useReducer, etc.
- Practical experience with TypeScript, Tailwind CSS, Bootstrap, SASS.
- Projects: Uzum Market Clone, YouTube Clone, Movie Ticket Booking App.
- Agile methodology, code review, and team collaboration.
